1 GENERAL PRODUCT DESCRIPTION

Description

Assorted wound dressings for minor wounds.

Beige micro-perforated polyethylene film evenly spread with an adhesive coating and with an absorbing wound pad, intended to be used on minor wounds for protection and absorption of exudates.

The adhesive side is protected by a siliconized paper that consists of two parts that partly overlap each other for easy application.

CE-labelled Medical device.

Storage information

Dry storage in room temperature. For maximum protection, keep in original package until use.
